

Student Advisory Council

September 30, 2021

Agenda

- Welcome
- Topics for Discussion:
 - Academic Programs
 - Course scheduling and availability
 - Course and program delivery modalities
 - Academic Support Services
- Stipend for Participation

Current Focus: Discovery

- What's working the way we are doing it today?
- What is not working the way we do it today?
- What are some things we should prioritize for improvement?

Academic Programs & Support

Academic Programs

- How have you made decisions about which program to pursue?
 - Were you decided before you enrolled?
 - What information was useful in determining your program?
 - Have you changed your program focus since you started?
 - Are the requirements easy to understand?

Course scheduling and availability

- How would you describe your registration experience?
 - What is working related to course selection and scheduling?
 - What is not working?
 - What ideas do you have about improvements we could make?

Course and Program Delivery Modes

Face-to-Face

“Hybrid”

Online

- Based on your experience with different modalities:
 - What is working?
 - What is not working?
 - What ideas do you have about improvements we could make?

Proposed Program Modality Definitions

- 1. Face-to-Face:** The program is limited to a set location, where instructor and students can engage in traditional interaction.
- 2. F2F+ (Remote Access):** The program is accessible via a blend of courses that may include some face-to-face classes in some locations, remote access courses, low-residency labs, and/or online courses. Remote access classes for students not in the face-to-face classroom occurs through a video conferencing platform such as Zoom or a secondary connected “telepresence” classroom.
- 3. Low-Residency:** The program offers flexibility for working adults via opportunities for low-residency face-to-face access, for example for lab courses, at a campus location paired with online or remote access learning.
- 4. Online:** The program offers access via online courses backed by a full array of virtual services and supports, with a potential blend of synchronous and asynchronous course components.

Modality Questions

- Are these definitions useful?
- Which of these modalities might you consider and why (or why not)?
- What kinds of technical or other support would you need in order to consider F2F+ or online courses?

Academic Support Services

- When you need academic help related to a course, where do you go?
